

AYOLEYI GBENGA-AYODEJI

MARVELOUS

Lagos/Ogun State, Nigeria • github.com/Ayoleyi-dev • ayoleyi-s-digital-architecture-hub.vercel.app

Biochemistry student and Software/Data Engineer bridging the gap between biological sciences and data-driven insights. Expertise spanning computer-aided drug discovery (CADD), full-stack web architecture (React), and data engineering (ETL, SQL, Python). Seeking to leverage dry-lab research capabilities and scalable software solutions to solve complex bioinformatic challenges.

EDUCATION & CERTIFICATIONS

- **Bachelor of Science in Biochemistry** – University of Lagos (Expected Aug 2027)
- **Certified Data Analyst** – TechCrush
- **Professional Certificate:** Bridging Bioinformatics and Chemoinformatics in Automated Drug Discovery

EXPERIENCE

Assistant Tutor & Community Manager (Data Analysis)

May 2026 – Present

Skill Up Programme, University of Lagos (ULLSSA)

- Mentoring 45 students through an intensive curriculum covering Excel, SQL, and Power BI, achieving a 92% completion rate.

Laboratory Intern (SIWES)

2025

NAFDAC

- Supported quality assurance and regulatory compliance processes within the laboratory.

HIGHLIGHTED PROJECTS

AI-Driven Homology & Targeted Drug Discovery

- Executed sequence alignment and 3D homology modeling utilizing SWISS-MODEL and Biopython.
- Conducted molecular docking simulations via AutoDock Vina and visualized binding affinities with PyMOL.

Public Health Data Warehouse & Analytics Pipeline

- Designed a Star Schema data warehouse in SQL Server with an automated Python ETL pipeline.

Human-Like Telegram Automation Bot

- Engineered a Python-based bot capable of context-aware interaction logic and automated media distribution.

TECHNICAL SKILLS

- **Bioinformatics:** Homology Modeling, Molecular Docking (AutoDock Vina), PyMOL, SWISS-MODEL, RDKit.
- **Software & Data:** Python (Pandas), SQL, React, JS/Tailwind, Power BI, REST APIs, Linux/WSL, Git.
