

AYOLEYI GBENGA-AYODEJI

MARVELOUS

Lagos/Ogun State, Nigeria • github.com/Ayoleyi-dev • ayoleyi-s-digital-architecture-hub.vercel.app

Software Engineer and Digital Architect specializing in high-performance frontend frameworks, vanilla web technologies, and programmatic automation. Experienced in deploying responsive React applications, integrating RESTful APIs, and engineering Python-based social media automation bots.

EXPERIENCE

Digital Architect & Automation Engineer

2025 – Present

Independent Freelance

- Engineered an automated Telegram bot using Python capable of dynamic, context-aware chat replies and image distribution, successfully bypassing templated-response fatigue.
- Architected multi-platform digital marketing funnels and high-conversion landing pages targeting university demographics.

SOFTWARE & WEB PROJECTS

ULLSSA Tech Symposium Platform

- Engineered an interactive registration portal handling 500+ concurrent users utilizing modern React architecture and Framer Motion for UI fluidity.

High-Performance E-Commerce Engine

- Built a zero-dependency storefront with vanilla JS and Tailwind CSS, reducing page load by 40% and drastically improving mobile conversion rates.

Digital Research Hub (Portfolio Engine)

- Developed a highly dynamic React/Vite portfolio featuring real-time GitHub API integration, multi-select filtering logic, and custom Framer Motion page transitions.

TECHNICAL SKILLS

- **Frontend Architecture:** React, Vite, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Framer Motion.
- **Backend & Automation:** Python, Telegram API, RESTful API Integration, Web Scraping (BeautifulSoup).
- **Infrastructure & Tools:** Git, GitHub, Vercel Deployment, Linux/WSL (Ubuntu), Bash Scripting.

EDUCATION

- **Bachelor of Science in Biochemistry**, University of Lagos (Expected Aug 2027)
